RAF BRADEY F. MATOZA

Makati City, Philippines | +63 992 707 3036 | rafbradey.fm@gmail.com | linkedin.com/in/raf-matoza | github.com/rafbradey

PROFESSIONAL SUMMARY

Technically versatile Information Technology graduate specializing in Application Development with commercial software development experience, university-level IT instruction, and published international conference research. Experienced in building web applications with React and Vite, working with relational databases, and integrating AI APIs into applications. Interested in software development, application engineering, data technologies, and other technical roles where I can contribute and grow.

EDUCATION & ACADEMIC HONORS

MAPÚA UNIVERSITY | Makati City, Philippines **Aug 2022 – Sept 2025**

Bachelor of Science in Information Technology, Specializing in Application Development | ***Graduated: September 19, 2025***

Graduated Cum Laude | General Weighted Average (GWA): 1.51

- **Dean's Lister:** Achieved continuous Dean's List honors across all semesters/terms throughout university tenure (2022 – 2025).
- **Mapúa Cardinal Excellence President's List Award:**
  - Ranked 1st — Academic Year 2023–2024, 4th Quarter
  - Ranked 3rd — Academic Year 2024–2025, 3rd Trimester
  - Ranked 4th — Academic Year 2023–2024, 3rd Quarter
- **Member:** Google Developer Student Club (GDSC) – Mapúa University
- **English Proficiency:** TOEIC Certificate — Upper Intermediate (CEFR Level B2)

TECHNICAL SKILLS

Programming Languages: Python, Java, JavaScript, TypeScript, C#, C++, Kotlin, PHP, VBA, GDScript *(Assessment focus: Python, Java)*

Web & Application Development: React, Vite, Angular, Spring Boot, JavaFX, Laravel, HTML, CSS

Databases: SQL, MySQL, Supabase

Tools & Technologies: Docker, Unity 6, Android Studio, Git, GitHub

PROFESSIONAL EXPERIENCE

USHER TECHNOLOGIES INC. | Quezon City, Philippines **Jan 2025 – Apr 2025**

IT Stack Assistant *(Onsite Academic Internship, 3 days/week)*

- Developed responsive web application features for the commercial USHER product using React and Vite within an active Scrum workflow.
- Collaborated in sprint planning, task estimations, and modular component implementation, gaining structured exposure to professional development practices.
- Translated product requirements into clean, maintainable frontend components, ensuring responsive UI behavior and adherence to team standards.

PROFESSIONAL EXPERIENCE (CONTINUED)

MAPÚA UNIVERSITY — SCHOOL OF INFORMATION TECHNOLOGY | Makati City, Philippines **Aug 18, 2025 – Aug 18, 2026**

Part-Time Instructor

- Delivered technical lectures and hands-on laboratory instruction across core IT subjects: Programming Fundamentals, Data Structures, Relational Databases (MySQL), Data Warehousing, Networking, Information Systems, and Computer Hardware.
- Communicated complex software and computational concepts into practical, structured programming exercises for students of diverse skill levels.
- Led hands-on diagnostic sessions, troubleshooting student software logic errors, relational query issues, network setups, and hardware diagnostics.

TECHNICAL PROJECTS

e-Simul8: VR Operating Room Procedure Simulation | *Unity 6, C#, Meta Quest 3S / 2* **Aug 2025**

Academic Thesis Project — Standalone Virtual Reality Training Application

- Engineered a standalone virtual reality surgical training simulation for nursing students, translating standardized operating room protocols into interactive 3D simulations.
- Implemented motion-controlled interactions, procedural verification modules, and real-time assessment logic in Unity 6 optimized for Meta Quest 3S and Meta Quest 2 headsets.

Budget Buddy: Desktop Financial Client with AI Assistant | *Java, JavaFX, Gemini API* **Nov 2024**

Academic Group Project — Application Development & Emerging Technologies

- Developed a cross-platform desktop budgeting client in Java and JavaFX for structured personal expense and savings tracking.
- Integrated the Gemini API to deliver contextual, real-time conversational assistance for user budgeting inquiries; coordinated development milestones.

Full-Stack E-Commerce Platform | *Angular, Spring Boot (Java), Docker, MySQL* **Nov 2024**

Course Project — Application Development 2

- Built a multi-tier web application featuring product catalogs, shopping cart workflows, and decoupled RESTful services with Spring Boot and MySQL.
- Configured Docker containerization across frontend and backend services to ensure reproducible local testing and consistent deployment.

PUBLICATIONS & INTERNATIONAL PRESENTATIONS

- **Evaluating the Effectiveness of AI in Integrated System Architectures to Combat Cybersecurity Threats** (Published Aug 2024)
  Presenter, **2024 IEEE 7th CCET** — Beijing, China. Researched machine learning and deep learning integration within threat-detection frameworks.
- **A Secure E-commerce Shopping Cart Design with MFA, Tokenized Payments, and Open-Source Integration** (Published Sept 2024)
  Presenter, **3rd ISBM** — Bangkok, Thailand. Analyzed security mechanisms in transactional web systems, focusing on MFA and tokenized payment architectures.
